

Farmers photovoltaic solar panels

Overview

One approach to decarbonising agriculture involves integrating solar panels – or photovoltaics (PVs) – into fields of crops, greenhouses and livestock areas. Often known as agrivoltaics, this can help farmers reduce their carbon footprint while continuing to produce food.

Farmers photovoltaic solar panels

Made in the Shade: The Promise of Farming with Solar Panels

Recently, the field of agrivoltaics has emerged to explore ways of incorporating solar arrays into farmland without sacrificing that farmland's arability, effectively allowing ...
