

Fiji 5G Communication Base Station Hybrid Energy Project

Overview

Will Digicel Fiji be able to launch 5G in Suva?

The upgrades are swiftly progressing in Suva as Digicel Fiji anticipates the imminent completion of 5G testing and the granting of regulatory approvals by the Government of Fiji, enabling Digicel Fiji to connect businesses and consumers with 5G.

Does Digicel Fiji have a 5G network?

Digicel Fiji's upgraded cell tower sites meet strict 5G cybersecurity standards, safeguarding critical national infrastructure with resilience and security. "Digicel Fiji is dedicated to providing high-speed connectivity and prioritising network security for our customers.

What are some examples of wind energy projects in Fiji?

These are mainly mini/micro hydro schemes, solar energy for lighting (solar home systems), water pumps, solar hot water system, solar video, television, refrigeration and steam plant for drying copra etc. The DOE has also installed numerous wind monitoring stations at selected sites in Fiji to assess the potential for wind power generation.

Will Fiji be able to generate wind power?

The DOE has also installed numerous wind monitoring stations at selected sites in Fiji to assess the potential for wind power generation. If these sites are found to be viable, potential investors and funding for wind power generation will be sought for development.

What does Digicel Fiji do?

"Digicel Fiji is dedicated to providing high-speed connectivity and prioritising network security for our customers. This collaboration underscores our commitment to upholding the integrity of telecommunications infrastructure while advancing 5G technology," added Farid.
