

France has wind power solar power storage and transmission

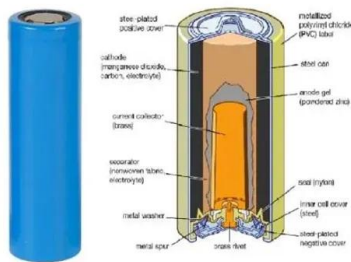

Overview

The electricity sector in France is dominated by , which accounted for 72.3% of total production in 2016, while and accounted for 17.8% and 8.6%, respectively. has the largest share of nuclear electricity in the world. The country is also among the world's biggest net exporters of electricity. The sector is almost entirely own.

Find here the data on electricity generation in France, presented either in aggregate or in detail by generation type: nuclear, conventional thermal, hydro, solar, wind and renewable thermal.
