

German energy storage vehicle sales price

Overview

How has the large-scale battery storage market evolved in Germany?

With the large-scale battery storage market in Germany on the cusp of a rapid expansion, consultancy Enervis is examining how revenues have evolved recently and what the future holds. Large-scale battery energy storage systems (BESS) are booming in Germany – and yet the market is only at the beginning of an enormous growth cycle.

How much does Germany spend on EV and stationary battery research?

Public research and development incentives for EV and stationary battery research amount to between EUR 80 million and EUR 85 million every year. As the European lead market in the energy transition age, Germany provides the opportunity for companies to develop, test, define and market new energy storage solutions.

What is the future of battery storage in Germany?

Intelligent control systems, the increasing use of AI and machine learning, and new innovative developments in battery storage technology are also driving the use of storage systems. One thing is clear – the market for large-scale battery storage systems in Germany is promising and will only grow in the future.

Why should you invest in large-scale battery storage systems in Germany?

The German market is currently very attractive for investments in large-scale battery storage systems. Therefore, we work together with our customers and partners on the successful implementation of our projects, thus creating the Basis for future-proof and sustainable value creation.

Is Germany a good place to invest in energy storage?

While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies

seeking to enter this fast-developing industry. The country stands out as a unique market, development platform and export hub.

How much do EVs cost in Germany?

In 2023, the volume weighted average price of EVs in Germany was around 60,100 USD – on average a USD 16,500\$ premium compared to new combustion engine vehicles in Germany. While growing, the market for used EVs is also still emerging: in 2023, around 97,400 transfers of BEV ownerships took place.
