

Good high-frequency inverter life

Overview

Let's talk about inverter lifespan. Inverters typically last 10-15 years, but with proper care, they can survive for 20 years or more. Of course, how long your inverter lasts depends on several factors. Frequency of use: The more you use your inverter, the sooner it may need replacing.

Good high-frequency inverter life

How Long Does an Inverter Last?

A good quality home inverter will be stable for 10-15 years, while a high load commercial system may need to be replaced between 5 and 10 years.

LF vs HF Inverter

Trying to weigh up between a single 18kw LF inverter and 2 \times 10kw HF inverters in parallel Loads will include 2 \times 1.5hp water pumps, pool pump, heat pumps, and workshop tools.

Low Frequency Inverters Versus High Frequency Inverters

Low frequency inverters, also known as heavy duty inverters offer a far longer life expectancy than light duty, high frequency inverters. Low frequency inverters also offer a much high peak power
