

# Grid-connected inverter input voltage

### **Overview**

Grid-tie inverters convert DC electrical power into AC power suitable for injecting into the electric utility company grid. The grid tie inverter (GTI) must match the phase of the grid and maintain the output voltage slightly higher than the grid voltage at any instant. A high-quality modern grid-tie inverter has a fixed unity , which means its output voltage and current are perfectly lined up, and its phase angle is within 1° of the AC power grid. The inverter has an internal com.

### **Grid-connected inverter input voltage**

### STEVAL-ISV002V1, STEVAL-ISV002V2 3 kW grid ...

The system operates with input voltages in the range of 200 V to 400 V and is tied to the grid at 230 Vrms, 50 Hz, through an LCL filter. Other peculiar characteristics of the proposed ...
