

Home Solar System Cost in Albania

Overview

Solar panels are sold for around 140,000 Albanian lek in the market, but citizens have paid 42,000 Albanian lek, with the remaining amount covered by the Government through one of the seven licensed service companies. How much do solar panels cost in Albania?

Solar panels are sold for around 140,000 Albanian lek in the market, but citizens have paid 42,000 Albanian lek, with the remaining amount covered by the Government through one of the seven licensed service companies. For the year 2024, there is no set date yet for the opening and closing of applications.

Who is the best solar panel company in Albania?

Empower tomorrow with DET, the most trustworthy solar panel company in Albania! Planning & Installation of Solar Energy Systems in Albania and the Southwest Balkans Discover how to cut your energy bills with top-quality solar solutions. Our expert tips and premium products make saving money easy and efficient.

Does Albania have a solar PV potential?

Explore the solar photovoltaic (PV) potential across 6 locations in Albania, from Tirana to Vlorë. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.

How much solar energy does Albania have a year?

With an average solar insolation of approximately 7.63 kWh/m²/day and an annual average of 2,400 to 2,500 hours of sunshine, Albania is poised to leverage its natural resources to enhance energy independence and sustainability.

What is solar investment in Albania?

Solar investment in Albania for the next 10 years refers to the country's strategic focus on expanding its solar energy capacity, driven by its advantageous geographical conditions and growing economic need for renewable energy sources.

Will solar power outpace wind development in Albania?

While Albania has considerable wind potential, particularly in areas like the Lezhe mountains along the Adriatic coast, solar energy is forecasted to outpace wind development in the coming years. BloombergNEF projects that wind energy will reach 370 megawatts of installed capacity by 2030, which is less than half of the forecasted solar growth.
