

# How much does solar energy storage cost

### **Overview**

Thinking about adding a battery to your solar panel system?

Learn what you can expect to pay and find out if the benefits outweigh the cost.

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+.

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. That's one reason why the majority of residential solar panel systems in the.

Solar batteries have become increasingly popular. However, it can be hard to know if a solar battery is right for you, so we put together some guidelines to help you know where you stand. Solar storage may be worth it for you if: 1. You have high electricity costs.

If you're planning to purchase one or more solar batteries, there are a few ways to save money on your purchase further down the road.

Most solar battery storage systems cost \$10,000 on average, with most ranging between \$6,000 and \$12,000. Prices range from \$400 for small units to over \$20,000 for larger systems. Key cost factors include battery type, capacity, installation labor, and additional equipment.
