

# How much does the Capital Communications BESS power station cost

#### **Overview**

Why is Bess so expensive compared to a lithium-ion battery?

A big driver of the fall in BESS costs will be a decline in the costs of the battery cells and packs themselves, which can make up half the cost of a lithium-ion BESS.

What are base year costs for utility-scale battery energy storage systems?

Base year costs for utility-scale battery energy storage systems (BESSs) are based on a bottom-up cost model using the data and methodology for utility-scale BESS in (Ramasamy et al., 2023). The bottom-up BESS model accounts for major components, including the LIB pack, the inverter, and the balance of system (BOS) needed for the installation.

What is a battery energy storage system (BESS) model?

Tailored to the specific requirement of setting up a Battery Energy Storage System (BESS) plant in Texas, United States, the model highlights key cost drivers and forecasts profitability, considering market trends, inflation, and potential fluctuations in raw material prices.

How much does a 60 MW Bess cost?

Using the detailed NREL cost models for LIB, we develop base year costs for a 60-MW BESS with storage durations of 2, 4, 6, 8, and 10 hours, shown in terms of energy capacity (\$/kWh) and power capacity (\$/kW) in Figures 1 and 2, A Goldman Sachs report from February 2024 indicates an average price of \$115 per kWh for EV batteries.

How profitable is battery energy storage system (BESS)?

Profitability Analysis Year on Year Basis: The proposed Battery Energy Storage System (BESS) plant, with an annual installed capacity of 1 GWh per year, achieved an impressive revenue of US\$ 192.50 million in its first year.

#### How much will Bess cost fall in 2022?

This broadly matches up with recent analysis by BloombergNEF which found that BESS costs have fallen 2% in the last six months, as well as anecdotal evidence of reductions after spikes in 2022. Compared to 2022, the national laboratory says the BESS costs will fall 47%, 32% and 16% by 2030 in its low, mid and high cost projections, respectively.
