

How much is the subsidy for Indonesian energy storage projects

Overview

How much money does Indonesia need for energy transition?

Energy transition funding needs estimated in Indonesia are 25-30 billion USD until 2030, which is equivalent to a value range of 8-8.5 billion USD per year. Indonesia's biggest challenge in the energy transition is how to meet these funding needs quickly.

Why does Indonesia subsidize fuel and electricity?

The Indonesian government subsidizes fuel and electricity to help keep energy affordable, especially for low-income groups (Ministry of Finance, 2010b). Energy subsidies are intended to increase household incomes in two ways. The direct effect is that, by paying less for fuel, households have more disposable income to spend on other things.

Does Indonesia overpay for renewable subsidies?

To ensure that the Government of Indonesia does not overpay for renewable subsidies, the cost of renewable supply would be capped at its economic value, which is calculated as the economic avoided cost plus the social benefits of externalities.

How can Indonesia ease the transition from fuel subsidies?

A suite of policies have been used by countries around the world, including Indonesia, to ease the transition away from fuel subsidies. The policies can be grouped into two categories: those that provide assistance to poor households and those that help the broader community to understand and support reform.

When will fuel subsidies be reformed in Indonesia?

In May 2011 the government announced that fuel subsidies will be retained but the distribution mechanism will be changed to a direct and targeted subsidy. A roadmap for the reform will be announced in July 2011 (KOMPAS,

2011b). The government of Indonesia has been trying to reduce subsidies for electricity by increasing tariffs.

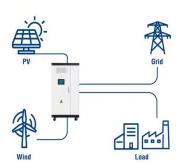

Why does Indonesia need a subsidy?

The Government of Indonesia, like many countries around the world, has used subsidies for decades to promote a range of social and economic objectives. Among the priorities vying for support are poverty alleviation, infrastructure development, health and education.
