

Huawei energy storage equipment related standards

Overview

Does Huawei's fire-free energy storage system redefine safety?

Abstract: With the battery pack-level thermal runaway control, Huawei's fire-free energy storage system (ESS) redefines safety. [Shenzhen, China, December 24, 2024] Huawei Digital Power and TÜV Rheinland jointly completed ESS safety tests on Huawei's Smart String & Grid Forming ESS Platform (LUNA2000-4472 series and LUNA2000-215 series).

What is Huawei digital power?

With safety as its top priority, Huawei Digital Power is driving the healthy and sustainable development of the energy storage industry, and making valuable contributions to the creation of clean, low-carbon, safe, and efficient new power systems.

What onsite control standards does Huawei provide?

In the mass production phase, Huawei provides onsite control standards (CTQ* or CTS*) of more than 200 articles for suppliers to ensure cell safety in manufacturing processes. Basically no tests. Cells are accessed based on the specifications and warranty of vendors • No strict requirements on cell specifications, with delivery as the main focus.

What is energy storage system products list?

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

What is Huawei ESS safety design?

In the current and future exploration, Huawei is committed to systematic safety design for C&I ESSs in three dimensions: device, asset, and personal. Huawei uses industry-leading safety protection technologies to cope with complex ESS safety challenges in scenarios and provide more reliable

solutions for property owners.

Why should you choose Huawei ESS?

Huawei uses industry-leading safety protection technologies to cope with complex ESS safety challenges in scenarios and provide more reliable solutions for property owners. Continuous exploration is indispensable for build-ing a better C&I ESS.
