

## Hydropower Energy Storage System

#### **Overview**

In 2009, world pumped storage generating capacity was 104, while other sources claim 127 GW, which comprises the vast majority of all types of utility grade electric storage. The had 38.3 GW net capacity (36.8% of world capacity) out of a total of 140 GW of hydropower and representing 5% of total net electrical capacity in the EU. had 25.5 GW net capacity (24.5%.

#### **Hydropower Energy Storage System**

#### **Pumped-storage hydroelectricity**

Pumped-storage hydroelectricity (PSH), or pumped hydroelectric energy storage (PHES), is a type of hydroelectric energy storage used by electric power systems for load balancing.
