

Iceland s photovoltaic energy storage companies exporting

Overview

What percentage of Iceland's energy is renewable?

About 85% of the total primary energy supply in Iceland is derived from domestically produced renewable energy sources. This is the highest share of renewable energy in any national total energy budget.

How much electricity does Iceland use?

In 2015, the total electricity consumption in Iceland was 18,798 GWh. Renewable energy provided almost 100% of electricity production, with about 73% coming from hydropower and 27% from geothermal power. Most of the hydropower plants are owned by Landsvirkjun (the National Power Company) which is the main supplier of electricity in Iceland.

Does Iceland use geothermal energy?

In 2013 Iceland also became a producer of wind energy. The main use of geothermal energy is for space heating, with the heat being distributed to buildings through extensive district-heating systems. About 85% of all houses in Iceland are heated with geothermal energy. In 2015, the total electricity consumption in Iceland was 18,798 GWh.

What percentage of Iceland's houses are heated with geothermal energy?

About 85% of all houses in Iceland are heated with geothermal energy. In 2015, the total electricity consumption in Iceland was 18,798 GWh. Renewable energy provided almost 100% of electricity production, with about 73% coming from hydropower and 27% from geothermal power.
