

## Indonesia Aluminum Energy Storage Project

### **Overview**

How many electrolytic aluminum projects are there in Indonesia?

Overall, Indonesia currently has 11 new electrolytic aluminum projects with a total production capacity of approximately 13 million tons. In recent years, China's electrolytic aluminum production capacity has gradually approached the ceiling of 45 million tons, and the expansion of domestic production capacity in China is limited in the future.

When will the PT Indonesia Asahan aluminum project start?

The first phase of the project is expected to be put into operation in the fourth quarter of 2025. The PT Indonesia Asahan Aluminium is the largest aluminum production company in Indonesia and the only state-owned enterprise engaged in aluminum smelting. At present, the enterprise has a production capacity of 300000 tons of electrolytic aluminum.

Will PT Westerfield alumina Indonesia build a 500000 ton electrolytic aluminum project?

It is rumored that a 500000 ton electrolytic aluminum project will be constructed. PT Westerfield Alumina Indonesia is a Southeast Asian company established by East Hope Group, planning to build a 2.4 million ton electrolytic aluminum project.

Which alum smelter has more value for Indonesia's economy?

more value for the economy. First, IEEFA notes that Indonesian 2021 aluminum demand totaled 350kt, while current aluminum capacity comes from a 250ktpa smelter operated by PT Indonesia Asahan Aluminium (Inalum). 22 Adaro has noted that 2025 Indonesian alum.

Why is Indonesian alumina so expensive?

Indonesian alumina is typically priced at a premium to Australian material on an FOB basis primarily due to the relative proximity to major destinations,

leading to comparative freight savings. Other aluminum smelter projects that are currently operating in Indonesia include the PT Inalum and PT Hua Chin smelters.

Will Bosai build a 1 million ton electrolytic aluminum project in Indonesia?

It is rumored that Bosai Minerals Group will build a 1 million ton electrolytic aluminum project in Indonesia. Overall, Indonesia currently has 11 new electrolytic aluminum projects with a total production capacity of approximately 13 million tons.
