

Indonesia expands energy storage equipment

Overview

Why is battery energy storage system important in Indonesia?

However, given the challenge of Indonesia's geological landscape, with many off-grid and remote areas, there is growing intermittency issue that hamper the development of solar and wind generation. Hence, the battery energy storage system (BESS) technologies have a critical role in the development of Indonesia's renewable energy.

Does Indonesia need a solar energy storage system?

As Southeast Asia's largest economy, Indonesia aims to source 23% of its energy from renewables by 2025, with plans to escalate this ratio by 2050. Energy storage systems (ESS) are critical to stabilizing the nation's grid and enabling seamless integration of solar power.

Does Indonesia need battery storage?

Indonesia aims to convert 250MW of diesel-generated power to renewable energy this year and will need battery storage to do this successfully. Image: PLN. Indonesia's state-owned utility and battery producer have launched a 5MW battery energy storage system (BESS) pilot project as it seeks to move away from diesel-generated power.

Does Indonesia have a grid-connected energy storage system?

There, the global system integrator Fluence recently turned on a 20MW/20MWh grid-connected BESS as part of a 1,000MW portfolio in development and construction for power company SMC Global Power. Indonesia's current pipeline of energy storage projects is mostly pumped hydro, totalling 4,063MW according to IHS Markit.

What's new at Indonesia's Energy Storage Summit 2024?

Indonesia's current pipeline of energy storage projects is mostly pumped hydro, totalling 4,063MW according to IHS Markit. The 2024 Summit included

innovative new features including a 'Crash Course in Battery Asset Management', Ask-Me-Anything formats and debate-style sessions.

What are some potential energy storage projects in ASEAN?

Other potential energy storage projects are the Cirata projects—the largest floating solar planned for ASEAN at 145 MW in Purwakarta region, West Java and eastern parts of Indonesia such as 2x50 MW in Bali and 70MW in the new capital, the city of Nusantara, East Kalimantan.
