

# Installed energy storage projects in India

#### **Overview**

India's current installed ESS capacity, as of Dec. 31, 2024, stands at 4.86 GW, consisting 4.75 GW of pumped storage (PSP) and 0.11 GW of battery energy storage system (BESS) projects. India is targeting non-fossil fuel capacity of 500 GW by 2030. What are the largest energy storage projects in India?

Listed below are the five largest energy storage projects by capacity in India, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment. Buy the latest energy storage projects profiles here. 1. AES-Mitsubishi Rohini – Battery Energy Storage System.

Does India need a solar energy storage system?

India's Ministry of Power has mandated all renewable energy implementing agencies and state utilities must incorporate a minimum of two-hour colocated energy storage systems (ESS), equivalent to 10% of the installed solar project capacity, in future solar tenders. From pv magazine India.

Which energy storage system is most popular in India?

Solar photovoltaic (PV) and battery energy storage systems (PV + BESS) comprised 90.6% of the total installed capacity. "India is an emerging market for energy storage, still in the early stages of development.

Is India a leader in battery energy storage & pumped hydro storage?

Battery prices are decreasing, and India is working on battery energy and pumped hydro storage policies. By 2032, India aims to be a market leader in the energy storage sector. A total of 178 MWh of battery energy storage projects were commissioned in 2024, while 29 GWh worth of such capacity moved to the execution phase.

When did India start adding energy storage capacity?

India began adding energy storage capacity in 2013 with small pilot projects.

By March 2024, the country's cumulative installed energy storage capacity reached 219.1 MWh ( $\sim$ 111.7 MW), with 120 MWh (40 MW) added in the first quarter of 2024 alone.

Is India's largest battery energy storage system powered by solar energy?

In February, the Solar Energy Corporation of India (SECI) commissioned India's largest Battery Energy Storage System (BESS), powered by solar energy.

#### Installed energy storage projects in India

#### <u>Understanding Battery Energy Storage</u> <u>Systems ...</u>

Learn about Battery Energy Storage Systems (BESS) in India, their role in enhancing RE integration, and how they contribute to a more ...
