

Introduction to Brazil's Co-Storage Energy Storage Project

Overview

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Can foreigners invest in battery storage businesses in Brazil?

Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery storage businesses or in the power sector (except in very specific segments or sectors of the economy).

Can Brazil be a big battery storage country?

With well-designed policies and regulations, Brazil has significant potential to follow in the footsteps of jurisdictions like California and Chile for large-scale battery storage, Germany for distributed and large-scale storage, and Australia for both pumped hydro and large-scale battery systems.

Could pumped hydro be the missing piece in Brazil's energy system?

Conclusion Although energy storage solutions have yet to be widely deployed in Brazil, generation flexibility remains a scarce commodity. Therefore, storage projects, including pumped hydro, could be the missing piece needed to enhance the country's energy system.

What is the energy matrix in Brazil?

Historically, the Brazilian electricity matrix has been based on hydropower. However, over the last two decades, the mix of installed capacity has changed significantly through the introduction of different energy sources.

What businesses are deploying Bess in Brazil?

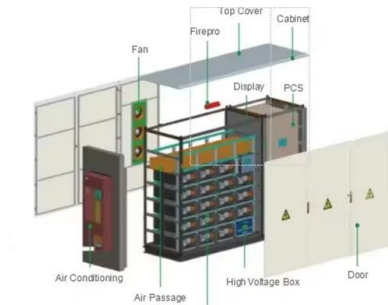

A few other businesses exist in Brazil as well, such as Micropower, Aldo Solar

and YouOn, for instance. The deployment of BESS can take various forms, and business initiatives may vary. To address this, the National Electric Energy Agency of Brazil (ANEEL) has identified a regulatory gap and initiated a three-phase roadmap.
