There is the option of switching the load to the bypass mains or to the inverter output, thanks to the manual bypass which is also housed in a 1/5, 19” rack module. System cabinets are available in a range of different sizes, coming with the required number of racks for inverters and for rectifiers.

What is a 100kW AC-DC converter cabinet?

Depending on the AC voltage. The 100kW, 690V AC-DC converter cabinet is a non-isolated high-power solution that operates at a maximum power of 100kW at 690V AC. With an operational voltage range from a minimum of 400 ph-ph V AC rms to a maximum of 690 ph-ph V AC rms, and a maximum current capacity of 80 A AC phase current on AC side.

What is a compact inverter system?

INVERTRONIC compact inverter systems and their racks, comprising hot-swapping 1/5 19" rack modules with a range of 3 heights, are characterised by their modular architecture. Electronic bypass switch assures system availability, enables interruption-free switching and is available in two power ratings.
