

Investment of 3 billion in energy storage projects

Overview

How will the \$3 billion eV & energy storage grants work?

The \$3 billion in grants for these new projects will help expand EV and energy storage production while reducing reliance on foreign supply chains, particularly China's. Furthermore, the selected projects will be administered by the U.S. DOE's Office of Manufacturing and Energy Supply Chains (MESC). The main goals of the funding are:

Where will a \$3 billion Energy grant go?

The funding will go towards new battery manufacturing facilities, as well as critical mineral processing plants and recycling sites. The Dow Chemical Co.'s manufacturing facility in Freeport, Texas, located on the Gulf Coast. The company is one of 25 projects selected to receive part of the \$3 billion from the Department of Energy.

How much money has Biden invested in batteries?

Since President Biden took office, companies have announced more than \$140 billion in investments in battery and critical mineral supply chains. DOE also recently announced over \$3 billion for selected projects to boost the domestic production of advanced batteries and battery materials nationwide.

How much money will the Biden-Harris administration give to battery companies?

U.S. To Supercharge Battery Production With New \$3 Billion Push U.S. To Supercharge Battery Production With New \$3 Billion Push Check out what the 25 battery companies will do with millions of dollars of federal grants. The Biden-Harris administration today announced an additional \$3 billion to boost America's battery production.

How will a \$3 billion EV Grant help the US?

Notably, this effort builds on the administration's previous commitment of

nearly \$35 billion to strengthen U.S. critical minerals and battery supply chains. The \$3 billion in grants for these new projects will help expand EV and energy storage production while reducing reliance on foreign supply chains, particularly China's.

How will a new battery project benefit the United States?

The funding is expected to be made available in the coming months and will ensure that the United States can produce batteries, as well as the materials that go into them, to increase economic competitiveness, energy independence, and national security.
