

# Is there a power station on Gambia Island

### **Overview**

How does electricity work in the Gambia?

In 2018, the effective electric installed capacity in The Gambia was around 135 MW. About 73% of this installed capacity is operated by NAWEC while the remaining 27% is operated by an IPP (Karpowership). Currently, Electricity is transmitted from these stations for distribution via five radial 11 kV feeders and three 33 kV feeders.

Where can I find information about energy in Gambia?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Gambia on the IndexMundi Homepage. Find relevant information for Gambia on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

Who owns the power plant in the Gambia?

These facilities are operated by National Water and Electricity Company (NAWEC) and Karadeniz Power ship Koray Bey Company Limited - an Independent Power Producer (IPP). In 2018, the effective electric installed capacity in The Gambia was around 135 MW.

Does the Gambia have a hydro potential?

Hydro potentials are non-existing in the Gambian territory. The average annual solar insolation for The Gambia is 4.5-5.3 kWh/m2-day, which represents a high generating potential for the country, making it interesting for PV Power Plants, Solar Home Systems (SHS), solar heater for the domestic and hotel industry and Hybrid Diesel-PV Systems.

Can wind energy be used for water pumping in the Gambia?

In the mechanical energy application, wind energy has been used for water pumping for many decades in The Gambia. This technology has provided

water to populations for decades, especially in the absence of electricity services and thereby providing the much-needed vital essentials of life.

What ecosystems are in the Gambia?

The Gambia has a rich variety of woodland ecosystems, including forests, closed and open woodland, tree and shrub savannah, mangrove, riparian and fringing savannah. The Gambia's forest cover has declined from 60% in the 1960s to 43% of the land area today. It's forest and woodland ecosystems supply about 85% of domestic energy requirements.
