

Italian power grid builds liquid flow energy storage power station

Overview

Edison and Webuild have entered into an agreement to develop pumped storage hydropower projects in southern Italy. These projects aim to generate at least 500MW of energy by 2030, enhancing Italy's energy autonomy and fostering economic development.

Italian power grid builds liquid flow energy storage power station

Flow batteries for grid-scale energy storage

Associate Professor Fikile Brushett (left) and Kara Rodby PhD '22 have demonstrated a modeling framework that can help guide the ...
