

Japan s first energy storage power station

Overview

The Okinawa Yanbaru Seawater Pumped Storage Power Station (\[\] \[\] \[\] \[\] \] \[\] \] Okinawa Yanbaru Kaisui Yōsui Hatsudensho) was an experimental hydroelectric power station located in Kunigami, Okinawa, Japan and operated by the Electric Power Development Company. It was the world's first pumped-storage facility to use seawater for storing energy. Its maximum o. FacilityThe power station was a pure pumped-storage facility, using the as its lower reservoir, with an effective drop of 136 m and maximum flow of 26 m /s. Its pipelines and pump turbine were installed undergroun.

The power station was a pilot plant funded by the and constructed by the Electric Power Development Company. A five-year verification operation was conducted beginning o.

• (Official site, in Japanese)• . Japan Commission on Large Dams. Archived from on 2002-07-08.

Take the Okutataragi Power Station in Hyōgo Prefecture, one of the world's largest with a capacity of 1,932 MW. Built in 1974, it's like the "Godzilla" of energy storage—massive and iconic.

Japan s first energy storage power station

Japan's first fund dedicated to grid storage batteries begins full

Going forward, the plan is to launch the first energy storage station around fiscal 2025, and then proceed with the development and operation of energy storage stations one after another. ...
