

Japanese energy storage emergency power supply manufacturer

Overview

Why are battery storage systems being installed in Japan?

Several megawatt-hours of residential battery storage systems, typically paired with solar PV, are being installed in Japan on a monthly basis. This is largely due to concerns about losing power at home, given the seismic activity the country is frequently subject to, as well as extreme weather events like typhoons.

Does Tokyo Gas have a battery energy storage system?

Tokyo Gas is also participating in the Japanese utility-scale battery energy storage system (BESS) market, signing a 20-year tolling offtake deal with Australian developer Eku Energy for a forthcoming 30MW/120MWh project.

Does Tokyo Gas offer battery control service?

Tokyo Gas opened its Battery Control Service programme to customer enrolment on 26 August, offering an upfront fee of ¥10,000 (US\$70) for joining and ¥200 per month thereafter.

What is Tokyo Gas Dr programme?

The programme is a renewal of a previously launched DR service from Tokyo Gas, leveraging its new Igniture brand which it established last year.
