

Kenya villa solar power generation system

Overview

What is the largest solar project in Kenya?

The Garissa solar plant, the largest solar project in Kenya and East Africa, is a \$138 million utility-scale solar photovoltaic (PV) farm located in Garissa County. For more information, explore the Kenya Solar Investment Report 2022, which includes a database of solar projects, investment details, players, and 2022 news per project.

Who is constructing a solar power plant in Kenya?

French firm Voltalia is the contractor for the engineering, procurement and construction (EPC) of the third largest solar power plant in Kenya, with a capacity of 100 MW. The electricity from the plant will be sold to KPLC at US\$0.12 per kWh.

Is Kenya a good country for solar energy?

Kenya is well-known for its abundant geothermal energy, but it also has significant potential for solar and wind energy. The government aims to increase solar power generation capacity to 600 MW by 2030, up from less than 100 MW currently installed (South Africa's largest solar project alone is nearly 100 MW).
