

# Latvia Energy Storage Power Generation

#### **Overview**

From 1 January 2023 Latvia banned the import of natural gas from Russia. The replacement comes from connections to LNG terminals, the LNG terminal in Lithuania, and from 2024 the recently opened Inkoo LNG terminal in Finland. JSC Conexus Baltic Grid is the natural gas in Latvia. International transmission pipelines are 577 km long, consisting of the Riga-Pahneva, Pleskava-Riga, Izbors.

Latvia's Energy Strategy 2050 outlines major changes in renewable energy production and storage, with significant investments planned in wind, solar, biomass, and biogas, as well as in energy storage technologies like batteries and subsurface systems to ensure supply stability [3].

# **Latvia Energy Storage Power Generation**

# Latvia Electricity Generation Mix 2024/2025, Low ...

Latvia's electricity mix includes 48% Hydropower, 28% Gas and 10% Solar. Low-carbon generation peaked in 2017.
