

Luxembourg solar photovoltaic module procurement channels

Overview

Are photovoltaic panels subsidised in Luxembourg?

The installation of photovoltaic panels is heavily subsidised by the Luxembourg government and local authorities. This practice is fully in line with the national objective of reducing greenhouse gas emissions (-55% by 2030). Consult our Guide to photovoltaic subsidies in Luxembourg (subsidies 2025).

Are photovoltaic panels and self-consumption compatible with all electricity suppliers in Luxembourg?

Photovoltaic panels and self-consumption are compatible with all electricity suppliers in Luxembourg. However, some are more suitable than others because they can: Invest part of your subscription in the development of power stations in Luxembourg and in the Grande Région (wind farms, solar panel farms, etc.).

How much does a C&I solar project cost in Luxembourg?

Luxembourg has kicked off its second tender for C&I solar projects ranging in size from 30 kW to 5 MW. It is offering rebates of up to €745 (\$835) per kilowatt installed and up to 55% of the total cost of buying and installing systems. Luxembourg has selected 75 solar projects in the nation's first procurement exercise for self-consumption.

How do solar panels work in Luxembourg?

To put it plainly: owners of solar panels consume the energy produced by their panels directly. If there is any electricity left over, it is sold back to the grid at a rate set by the government. This is the the most subsidised in Luxembourg. This system has a number of advantages: It also enables them to generate additional income.

How can Luxembourg save money on solar panels?

Luxembourg homeowners can reduce their electricity bills and sell surplus

production thanks to the self-consumption model. The government is proposing subsidies covering up to 80% of installation costs with an estimated return on investment of between 5 and 7 years. How steep should the roof be for solar panels?

.

How much does a photovoltaic panel cost?

By contrast, photovoltaic panels, which cost an average of €1,200 to €1,800 per kilowatt installed, can convert around 15 to 22% of solar energy into electricity, depending on the type of cell used (monocrystalline, polycrystalline).
