

# Madagascar s household energy storage installed capacity

### **Overview**

On June 7, 2025, a complete residential energy storage system comprising a 30 kWh GSL energy storage battery, a 15 kW Solis inverter, and solar photovoltaic panels was successfully installed in Madagascar, enabling customers to achieve self-sufficiency in daily electricity consumption and transition to a green energy lifestyle. How much energy does Madagascar have?

Around a quarter of the population of Madagascar has access to electricity, and only 1.5% has access to clean cooking facilities. In 2019, Madagascar's energy mix was dominated by biofuels and wastes (85%), with oil products (11%), coal and hydro accounting for the rest of the total energy supply.

How many people in Madagascar have access to electricity?

In 2020, less than 5% of the population had access to clean cooking and 27% had access to electricity. The Government of Madagascar has set a target of reaching 70% electricity access rate by 2030. Less than one quarter of the population of Madagascar has access to electricity, and only 1.5% has access to clean cooking facilities.

Is nuclear power a good source of electricity in Madagascar?

This can be an important source in lower-income settings. Madagascar: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity. For a number of countries, it makes up a large share of electricity production.

Is biomass a source of energy in Madagascar?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Madagascar: How much of the country's energy comes from nuclear power?

What is Madagascar's energy mix?

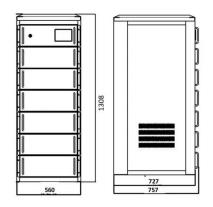

In 2019, Madagascar's energy mix was dominated by biofuels and wastes (85%), with oil products (11%), coal and hydro accounting for the rest of the total energy supply. In 2020, less than 5% of the population had access to clean cooking and 27% had access to electricity.

Does Madagascar have oil?

Even though Madagascar has oil in place the oilfields are not being exploited yet. 14.5% of total energy supply were net imports of fossil fuels. The per capita primary energy consumption in Madagascar was 508 kWh in 2021. In 2022, total final consumption was 84% biofuels and waste, followed by 11% oil products.
