

Make your own mobile outdoor power supply

Overview

The Battery Used in This Project: 122 Amp Hour Battery Upgraded Battery I Recommend (AGM): 100 Amp Hour AGM Battery Upgraded Battery I Recommend (LiFePO4): LiTime 100Ah Deep Cycle LiFePO4 Battery 100 Watt Solar Panel from Harbor Freight.

One important factor to consider when building this DIY solar power station: Since I've gone with a flooded lead-acid battery, it is extremely important to not drain the capacity past 50%. This is due to something called depth of discharge (D.O.D). Flooded.

Now that you've gathered everything you need for your DIY solar power station, it's time to get building! I began by drawing up a crude wiring.

We'd love to hear from you and see how your DIY power station turned out! DM us a photo or video of your project in action. Have any questions?

.
