

### Malawi Energy Storage Industrial Park Power Distribution Project

#### **Overview**

What is the energy sector support project for Malawi?

The Energy Sector Support Project for Malawi is a USD 84.7 million loan agreement approved by the World Bank in 2011. It aims to increase the reliability and quality of electricity supply in the major load centres.

Can a power plant be built on a river in Malawi?

Realizing that it is risky to have all power plants on one river and from one source, Malawi has plans to diversify its energy source to other sources like solar, wind, geothermal etc. Currently, feasibility studies for wind, solar, cogeneration and other potential hydro power sites on other rivers are in progress.

Who owns power stations in Malawi?

This article lists power stations in Malawi. All stations are owned by the Electricity Supply Commission of Malawi (ESCOM). The list is not exhaustive. Operational since 16 November 2021. ^ Kutengule, Memory (10 April 2018). "Malawi: Power Situation Will Improve - Masi". Lilongwe: Malawi News Agency via AllAfrica.com. Retrieved 14 April 2018.

How can Malawi achieve a cleaner energy future?

The project will also contribute to a cleaner energy future for Malawi, reducing reliance on costly diesel generators, cutting carbon emissions by  $\sim 10,000$  tonnes annually, and unlocking the full uptake of at least 100 MW of variable renewable energy, such as solar and wind power, into the grid.

What is the Malawi Bess project?

The Malawi BESS project will guide the scale-up of BESS projects in the Consortium's participating countries. To alleviate energy poverty by 2030 and save a gigaton of CO2 in low and middle-income countries, it is estimated that 90 GW of BESS must be developed to support the required 400 GW of

Can Malawi achieve universal electricity access by 2030?

We look forward to continuing our partnership with the Government of Malawi to support the country's ambition to achieve universal electricity access by 2030 as we pursue the goals of Mission 300: connecting 300 million Africans to electricity by 2030 at unprecedented scale and speed."
