

# Malawi Station-type Energy Storage System

#### **Overview**

The Global Energy Alliance for People and Planet (GEAPP) and the Government of Malawi have officially launched the construction of a 20 MW battery energy storage system (BESS) at the Kanengo substation in Malawi's capital city, Lilongwe. This is GEAPP's first BESS project in Africa. What is the purpose of a fuel storage facility in Malawi?

The purpose of Government fuel storage facilities in Malawi includes utilizing them as inland dry ports and common-user facilities, ensuring effective participation of Malawian nationals in the petroleum products market, and developing guidelines for franchising of liquid fuel outlets.

How can Malawi achieve a cleaner energy future?

The project will also contribute to a cleaner energy future for Malawi, reducing reliance on costly diesel generators, cutting carbon emissions by  $\sim 10,000$  tonnes annually, and unlocking the full uptake of at least 100 MW of variable renewable energy, such as solar and wind power, into the grid.

Is Malawi a proof point for geapp's Bess project?

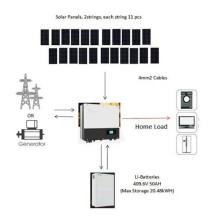

By breaking ground for this BESS project (and its subsequent completion expected in 2025), Malawi is an important proof point for the BESS Consortium launched by GEAPP at COP28 to secure 5 gigawatts (GW) of BESS commitments in low and middle income countries (LMICs) by the end of 2024.

How can collaboration improve the resilience of Malawi's grid?

By enhancing the stability and resilience of Malawi's grid, it demonstrates the power of collaboration in advancing energy access, reducing emissions, and supporting livelihoods.
