

Malaysia power generation equipment container

Overview

operates three schemes in the with an installed generating capacity of 1,911 (MW). They are the , and hydroelectric schemes with 21 dams in operation. A number of also own and operate several plants. Independent hydroelectric schemes

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

How much electricity does Malaysia generate a year?

In the year 2011, the total electricity generated was 127069 GWh with a generation mix of gas (43.86%), coal (41.18%), hydro (6.34%) and the rest diesel and biomass. (Source: Electricity Supply Industry in Malaysia – Performance and Statistical Information, Energy Commission, 2011 Edition).

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to +40°C. The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers.

What types of containers are available?

Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers. These include several heat recovery configurations, exhaust after treatment systems, compliance with country-specific regulations, earthquake safety requirements and various ambient conditions.

What are the sound pressure levels available for genset containers?

Lower sound pressure levels are available on request. The standard ventilation is designed for ambient temperatures from -25°C to $+34^{\circ}\text{C}$. All genset containers are also available with an option for -40°C and most variants can be upgraded for $+45^{\circ}\text{C}$.
