

# Minimum specifications for photovoltaic panels

### **Overview**

The RERH specifications and checklists take a builder and a project design team through the steps of assessing a home's solar resource potential and defining the minimum structural and system components ne.

What are the safety standards for photovoltaic modules?

Safety standards ensure that PV modules demonstrate non-hazardous failure modes. Performance standards include IEC 61215, which specifies requirements for the design qualification and type approval of terrestrial photovoltaic modules suitable for long-term operation in general open-air climates, as defined in IEC 60721-2-1.

What are the nameplate ratings on photovoltaic panels & modules?

The nameplate ratings on photovoltaic (PV) panels and modules summarize safety, performance, and durability specifications. Safety standards include UL1730, UL/IEC61730, and UL7103, a recent standard for building integrated photovoltaics (BIPV). Safety standards ensure that PV modules demonstrate non-hazardous failure modes.

What are the requirements for ground-mounted photovoltaic panels?

Ground-mounted photovoltaic panel systems shall comply with Section CS512.1 (IFC 1204.1) and this section. Setback requirements shall not apply to groundmounted, free-standing photovoltaic arrays. A clear, brushfree area of 10 feet (3048 mm) shall be required for groundmounted photovoltaic arrays. CS512.5 (IFC 1204.5) Buildings with rapid shutdown.

What are the performance standards for terrestrial photovoltaic modules?

Performance standards include IEC 61215, which specifies requirements for the design qualification and type approval of terrestrial photovoltaic modules suitable for long-term operation in general open-air climates, as defined in IEC 60721-2-1. It applies only to crystalline silicon module types.

How wide should a photovoltaic pathway be?

A pathway not less than 4 feet (1219 mm) wide bordering 4-foot by 8-foot (1219 mm by 2438 mm) venting cutouts every 20 feet (6096 mm) on alternating sides of the pathway. CS512.4 (IFC 1204.4) Ground-mounted photovoltaic panel systems. Ground-mounted photovoltaic panel systems shall comply with Section CS512.1 (IFC 1204.1) and this section.

Does a roof support solar photovoltaic panels or modules?

The structure of a roof that supports solar photovoltaic panels or modules shall be designed to accommodate the full solar photovoltaic panels or modules and ballast dead load, including concentrated loads from support frames in combination with the loads from Section CS507.1.1.1 (IBC 1607.13.5.1) and other applicable loads.

## Minimum specifications for photovoltaic panels

## Residential Solar Panel Requirements

NFPA 1 provides guidance on how solar photovoltaic panels must be installed on the roofs of homes.
