

# Mongolia implements new energy storage policy

#### **Overview**

Will Mongolia have a battery energy storage system?

A planned battery energy storage system for Mongolia will be the largest of its type in the world and provide a blueprint for other developing countries to follow as they decarbonize their power systems. Mongolia's coal-dependent energy sector accounts for about two thirds of Mongolia's greenhouse gas emissions.

What is Mongolia's Energy Policy?

Mongolia has abundant natural and mineral resources. To efficiently meet most of its daily energy needs these resources need to be properly developed and managed. Its energy policy aims to ensure access of its citizens to modern energy services developed on the basis of its important and high potential renewable energy sources.

Does Mongolia have a coal-dependent energy sector?

Mongolia's coal-dependent energy sector accounts for about two thirds of Mongolia's greenhouse gas emissions. World's largest battery energy storage system planned in Mongolia with ADB backing will provide a blueprint for other developing countries to decarbonize power systems.

What is Mongolia doing to improve power supply?

Mongolia development its southern is planning Mongolia power supply needs load. Inner Mongolia is to develop several mines China-Mongolia borderline continuing Mongolia, there growth of bilateral Mongolia is 3103 growth of power. Initiative. China, Russia and Mongolia. Mongolia, it will improve the reliability of Mongolia grid.

Will Mongolia's new battery energy storage system bring back blue skies?

New ADB-backed battery energy storage system in Mongolia will put on track the decarbonization of the energy sector and help unlock renewable energy

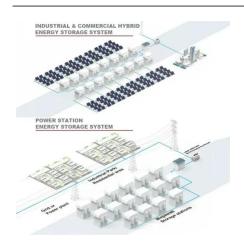

potential to bring back blue skies to Mongolia's urban areas.

Why does Mongolia have a shortage of energy?

Mongolia is in the midst of a demographic change as the rapidly growing population increasingly gravitates toward the cities, creating a need for energy that cannot keep pace with demands. On the periphery of urban areas, the informal ger areas lack public services such as district heating.
