

# Mongolia user-side energy storage solution for peak shaving and valley filling

#### **Overview**

To enhance peak-shaving and valley-filling performance in residential microgrids while reducing the costs associated with energy storage systems, this paper selects retired power batteries as the storage solution, breaking through existing optimization models.

#### Mongolia user-side energy storage solution for peak shaving and va

#### **Microsoft Word**

Regarding the capacity configuration under specific applications, in [12] the community energy storage allocation method for peakshaving and valley filling is studied.
