

Mozambique Industrial Energy Saving and Storage Equipment Processing

Overview

Is battery storage a key technology for Mozambique's future?

Globeleq sees battery storage as a key technology for Mozambique's future. Storage costs are expected to continue decreasing, so those systems will become more competitive and will be able to contribute more.

Should Mozambique export electricity?

One of the big challenges of Mozambique is its size and shape, which make the transportation of electrons across the country quite expensive. Exporting electricity would bring foreign currency that can support investments in domestic transmission and distribution infrastructure.

Why should Mozambique be a regional power supplier?

First, to ensure that Mozambique has reliable and cost-effective power generation capable of meeting its 2030 electrification goals. Second, to establish Mozambique as a regional power supplier of choice. South Africa has a critical shortage of electricity, and Zambia and Zimbabwe also require power.

When did Globeleq & Mozambique launch a solar power plant?

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale energy storage system.

What is Mozambique's investment climate?

Mozambique's investment climate needs to remain predictable, not just in the electricity sector, but also across industries such as tourism, logistics and agriculture that will drive demand for electricity as the economy grows.

Is Mocuba a good opportunity for expansion?

The Mocuba solar plant presented a good opportunity for expansion because it was already operational and EDM's experience with the facility was positive. We are working with EDM to potentially double Mocuba's generation capacity and add battery storage, strengthening the grid in Mozambique's central region.

Mozambique Industrial Energy Saving and Storage Equipment Procurement

Mozambique Industrial and Commercial Energy Storage Project

Ncondezi Energy Limited has announced that its maiden Commercial and Industrial (C& I) 400kWp solar and 912kWh battery storage project in Mozambique is on track. According to ...
