

New Energy Storage Construction Budget Building

To Strive forward No Energy Waste

- ✓ All in one
- ✓ 100~215kWh
High-capacity
- ✓ Intelligent
Integration

Overview

How much does it cost to build an energy storage system?

Enel X referred to a recent survey of energy storage systems report that found they typically cost US\$1 million per megawatt to build. “We are purchasing it, we’re building it together with subcontractors, and we’ll own and operate the system on the behalf, collectively, of Imperial and ourselves,” Martin said.

Where are the energy storage projects being built?

The energy storage projects will be located at three existing SCE power substations: 225 MW at Springvale Substation in Big Creek-Ventura, 200 MW at Hinson Substation in the Los Angeles Basin, and 112.5 MW at Etiwanda Substation in the Los Angeles Basin.

How much does a battery project cost?

Developer premiums and development expenses - depending on the project's attractiveness, these can range from £50k/MW to £100k/MW. Financing and transaction costs - at current interest rates, these can be around 20% of total project costs. 68% of battery project costs range between £400k/MW and £700k/MW.
