

Niger dedicated solar power generation for home use

Overview

Where is solar energy used in Niger?

Solar energy is well-suited for use in Niamey and Zinder, located at lower latitudes, as they show less variability in solar radiation throughout the year. Niger has a long history of solar energy use, which began in the mid-1960s with the establishment of the Centre National d'Énergie Solaire (National Solar Energy Centre; CNES).

Why is Niger a pioneer in solar energy?

Niger was one of the first countries to consider renewable energy technologies as a solution to its energy needs. This commitment dates back to the 1960s, when Niger set up the Solar Energy Office (Office de l'Energie Solaire – ONERSOL), later renamed the National Solar Energy Centre (Centre National d'Énergie Solaire – CNES).

What is the proposed price of the solar plant in Niger?

The government of Niger is negotiating a PPA for a 20 MW solar plant with a French company. However, this project is facing opposition due to the proposed price of USD 0.165/kWh, which is significantly higher than imports from Nigeria but lower than the utility domestic generation costs.

Are there any off-grid solar energy systems in Niger?

Yes, there is considerable experience of off-grid solar energy systems in Niger. These include off-grid PV electrification, water pumping, and solar water heating systems. The main decentralised renewable energy system promoted in Niger for rural electricity is solar PV.

How has solar technology been promoted in Niger?

Solar PV and other solar energy technologies have been promoted in Niger through various outlets, including the national school television programme. Installation of solar technology has continued, particularly in PV pumping

areas and through education and health infrastructure electrification.

What is the largest solar power plant in Niger?

This has been made possible by the commissioning of the Gourou Banda solar power plant, with a capacity of 30 MWp. Equipped with 55,608 solar panels, each with an output of 540 W, this is the largest solar photovoltaic park in operation in Niger.
