

# North Korea Power Base Station Project

### **Overview**

Orangchon Power Project is an ongoing hydroelectric construction project, described as North Korea's "most ambitious hydroelectric projects during the past thirty years". The project crosses 45 km of the Orang River and stretches through 40 km of water tunnels, past 4 dams and 5 power stations. The.

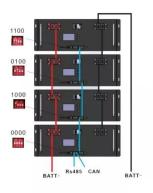

The project began under the leadership of in 1981 but stagnated for a variety of reasons, but resumed in 2000 when visited the site and assigned "national."

In August 2022, the final power station was built, Orangchon Power Plant No.3, 41 years after North Korea's former leader first announced it. An audit statement of Power.

The Tanchon Power Station Project is an ambitious and complex engineering strategy that relies on a system of dams, waterway tunnels, and power stations designed to provide a constant source of water to ensure the consistent generation of electrical power in the several hundreds of thousand-kilowatt range.
