

# North Macedonia communication base station wind and solar complementary planning

### **Overview**

What is the Integrated National Energy & Climate Plan of North Macedonia?

The Integrated National Energy and Climate Plan of North Macedonia elaborates on all five dimensions of the Energy Union i.e. decarbonisation (addressing two segments: greenhouse gas emissions and renewable energy sources), energy efficiency, security of energy supply, internal energy market, and research, innovation and competitiveness.

Who is the Energy Regulatory Commission of Macedonia?

The Energy Regulatory Commission of Macedonia also participates, as an observer, in the work of the Council of European Energy Regulators (CEER).

What is the energy mix in Macedonia?

The energy mix from domestic resources in Macedonia is dominantly based on lignite, biomass and, depending from the hydrology, electricity production from hydro power plants.

What is Macedonia's Energy Strategy?

Thus, Macedonia's goal is to increase the number of consumers that can provide balance services. The Energy Strategy envisages introduction of a significant share of electric vehicles in the system, as a way of increasing the RES share in the transport.

What are the national objectives of the Macedonian energy system?

National objectives with regard to increasing: the diversification of energy sources and supply from third countries for the purpose of increasing the resilience of regional and national energy systems; The Macedonian objective is to fulfil the RES target in 2030, which will contribute to diversification of the energy sources.

How will electrification improve the energy situation in Macedonia?

Electrification of the heating and cooling sector, as well as increasing the heat consumption, which are the main priorities in the National Strategy for Energy Development up to 2040 (Energy Strategy), will contribute to improving the Macedonian situation concerning this indicator. Figure 20.

# North Macedonia communication base station wind and solar compl

# Report on the Green Infrastructure and Spatial Planning in ...

To achieve a developed Balkan Green Belt (BGB) in Albania and North Macedonia with a secure connectivity as part of the Green Infrastructure (GI), both within and outside of protected ...
