

# Norway communication base station power supply construction

### **Overview**

Where are electricity production resources located in Norway?

Electricity production resources are often located far from where consumption takes place. A well-developed electricity grid makes it possible to transmit power from the hydropower plants in the southwest and north to consumers in other parts of Norway and abroad.

Why does Norway have a power exchange system?

The power exchange between Norway and other countries ensures sound overall resource use and improved value creation. The electricity grid enables electricity transport from producers to consumers, and connects Norway's power system to other countries' systems.

How many kV does a transmission line carry in Norway?

In Norway, Statnett is the designated transmission system operator (TSO). The transmission grid carries a high voltage, usually 300 to 420 kV, but in certain parts of the country there are also lines carrying 132 kV. The total length of the transmission grid is about 12 000 km.

Who is a transmission system operator in Norway?

There are specific requirements relating to transmission system operators. In Norway, Statnett is the designated transmission system operator (TSO). The transmission grid carries a high voltage, usually 300 to 420 kV, but in certain parts of the country there are also lines carrying 132 kV.

How much offshore wind power will Norway have by 2040?

The Norwegian government's ambition is to allocate areas equivalent to 30 GW of offshore wind power by 2040. Statnett will prepare the onshore power system to receive the offshore wind that will potentially be developed. We also plan to be able to develop possible hybrid grid solutions in the future.

Are there other Ops projects underway in Norway?

There is a range of other OPS projects underway in Norway and more are expected to come. ENOVA has been a great and very important catalyst for the uptake and implementation of OPS technologies and for installation of a shore-based OPS infrastructure in Norway.
