

# Oman Mobile Energy Storage Power

#### **Overview**

What percentage of Oman has access to electricity?

According to the World Bank, access to electricity amount to 98.0 %. The Oman Power and Water Procurement Company (OPWP) is the planning body for power supplies in the country. OPWP is responsible for securing electricity and water production capacities in the country and the single buyer of power and water for all IPP/IWPP projects.

How much energy does Oman use?

In 2011, oil accounted for 71% of Oman's total primary energy consumption, and natural gas made up the remaining 29%. With the exception of 2009, Oman's petroleum consumption rose steadily over the past decade, reaching 154 000 barrels/d in 2013.

How much does it cost to generate power in Oman?

It has a 54-m rotor diameter and a working velocity between 3 and 10 m/s. With a USD\$1.2 million capital cost and USD\$750,000 maintenance cost over 20 years, the power generation cost would be USD\$0.119/kW. This cost is the lowest possible for generating power in the north of Oman.

How much will Oman's power sector invest in the next six years?

Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to 2030.
