

Onsite energy plus solar cells

Overview

What is Onsite Energy?

Onsite energy refers to electric and thermal energy generation and storage technologies that are physically located at a facility and provide alternative energy services directly to the site.

Where can I find information about Onsite Energy?

Visit the Onsite Energy website to: Learn more about the program. Explore technology areas. Find resources. Join upcoming events. Contact OnsiteEnergy@ee.doe.gov with questions.

What is the DOE Onsite Energy Program?

The U.S. Department of Energy's (DOE) Onsite Energy Program provides regionally tailored technical assistance support for industrial sites, and other large energy users, installing electricity generation and storage technologies at their facilities.

Why do manufacturing facilities use onsite energy?

By generating and storing electricity and heat onsite, manufacturing facilities can purchase energy when it is most economical, improving resilience, increasing flexibility, and reducing operating costs. How Can the Program Help You?

.

Who funds the Onsite Energy Program?

The Onsite Energy Program is overseen and funded by DOE's Industrial Technologies Office. The TAPs are also supported by a trio of DOE national laboratories (the National Renewable Energy Laboratory, Oak Ridge National Laboratory, and Pacific Northwest National Laboratory) with subject-matter expertise in onsite energy deployment.

Where can I find information about onsite energy deployment?

The TAPs are also supported by a trio of DOE national laboratories (the National Renewable Energy Laboratory, Oak Ridge National Laboratory, and Pacific Northwest National Laboratory) with subject-matter expertise in onsite energy deployment. Visit the Onsite Energy website to: Learn more about the program. Explore technology areas. Find resources.

Onsite energy plus solar cells

Onsite Energy Program

The Onsite Energy Program is an initiative to provide technical assistance for industrial facilities and other large energy users to increase the adoption of onsite clean energy technologies.
