

Operating power supply for communication base stations

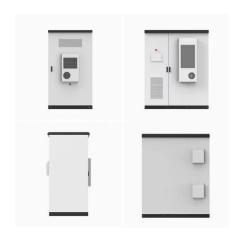

Overview

The mobile communication base station can be supplied with electricity through two types of AC and DC power supply sources. AC power sources include local power grids, wind generators, diesel generators, while DC power sources include batteries and solar panels.

Operating power supply for communication base stations

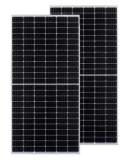

Selecting the Right Supplies for Powering 5G Base Stations

These tools simplify the task of selecting the right power management solutions for these devices and, thereby, provide an optimal power solution for 5G base stations components.
