

Outdoor power supply of several hundred watts is good

The image shows a house with solar panels on the roof. In the foreground, there is a large outdoor power supply unit with multiple battery modules. The unit is white and black, with a digital display and various ports. To the right of the unit, there are four circular icons with text descriptions:

-  easy to install and use
-  World wide Products
-  faster charging and discharging
-  Multiple protection with alarm systems

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO₄

Overview

How much wattage do outdoor lights need?

Before calculating wattage requirements, you'll need to identify exactly why you're installing outdoor lights. Security lighting typically requires higher wattage (50-100 watts for traditional bulbs or 10-20 watts for LEDs) to illuminate larger areas and deter intruders.

What wattage should I use for patio lighting?

What's the recommended wattage for patio and deck lighting?

For deck and patio lighting, use varied wattage based on function: 10-15 watts LED per 100 square feet for general illumination, 5-7 watts LED for step lights, and 8-12 watts for task lighting areas (grilling or dining spaces).

How does wattage affect outdoor lights?

Wattage directly determines how bright your outdoor lights will shine and how much electricity they'll consume. A higher wattage bulb produces more lumens (the actual measure of brightness) but draws more power from your electrical system.

How many Watts should a yard light bulb be?

You'll want different types because your yard isn't one-size-fits-all, and neither should your lighting be. Different spots call for specific low wattage bulbs. Low wattage light bulbs work here; around 5 to 10 watts if you're using LEDs. Excellent choices also come in the 3 watt range.

What wattage should a floodlight be?

Floodlights and security fixtures should cover big areas. For these, go with LED light bulbs wattage ranging from 20 to 50 watts. That kind of power delivers high lumens for security.

How many Watts should a garden lighting fixture be?

Space fixtures 6-8 feet apart for consistent light distribution. Garden accent lighting works best at even lower wattages – 2-5 watts LED for highlighting plants and landscape features. Solar-powered options typically deliver 2-4 watts per fixture, ideal for subtle garden illumination.
