

Panama invests in photovoltaic container room

Overview

How many solar installations are there in Panama?

According to data from the Public Services Authority (Asep), there are at least 49 solar installations in Panama that will produce 7.7% of the country's total electricity by 2024.

What is Panama's Plan for distributed-generation PV?

The government of Panama has outlined a new strategy for distributed-generation PV. The Central American country currently has an installed distributed-generation solar capacity of 46.63 MW. Selected projects will secure five-year power purchase agreements and will have to begin commercial operation on January 1.

What is the largest PV plant in Panama?

The Sol Real project is the largest PV plant built in the Central American country to date. With seven large-scale PV projects connected to the grid last year, Panama has reached a cumulative PV capacity of 89 MW.

Why is Panama so attractive to investors?

Image: Avanzalia Among the Central American states, Panama has become very attractive to investors, not only because it boasts a stable government and uses the US dollar as its currency, but also due to the government now deploying a range of fiscal incentives to support PV, including an exemption on import taxes.
