

Philippines Energy Storage Project Manufacturing Project

Overview

What is the future of energy storage in the Philippines?

Under the Philippine energy scenario, peak demand is seen growing by 5.3 percent annually until 2028. Energy storage is stepping into the spotlight of the country's green transition, with more companies making bold investments to unlock its game-changing potential.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

How much battery storage capacity will the Philippines have?

As the Philippines gears up for the entry of more renewables into the grid, the government anticipates close to 2,000 MW of battery storage capacity to complement them. According to DOE data as of end-March, ESS projects with a combined capacity of 594 MW are committed to come online over the next three years.

What is EDC doing in the Philippines?

With the Philippines working to increase its renewable energy share and reduce dependence on fossil fuels, EDC's twin focus on geothermal expansion and energy storage places it at the forefront of a low-carbon transition. Follow Power Philippines on Facebook and LinkedIn or join our Viber community for more updates.

Why is EDC expanding its power supply to the Philippines?

The expansion is part of EDC's long-term strategy to provide more round-theclock, zero-carbon power to the Philippine grid. "We want to ensure that we

are ready to provide more of our reliable source of 24/7 clean power to the grid as the country accelerates its decarbonization mission," Cainglet said.

Is energy storage stepping into the green transition?

MANILA, Philippines — Energy storage is stepping into the spotlight of the country's green transition, with more companies making bold investments to unlock its game-changing potential. In a historic first, the Marcos administration is integrating energy storage system (ESS) components into the fourth round of the green energy auction or GEA-4.

Philippines Energy Storage Project Manufacturing Project

Philippines Breaks Ground on World's Largest Solar and Battery Storage

This facility, spanning Nueva Ecija and Bulacan, will be the world's largest single-site solar and BESS project. The first phase of the project will deliver 2,500 MW of capacity, ...
