

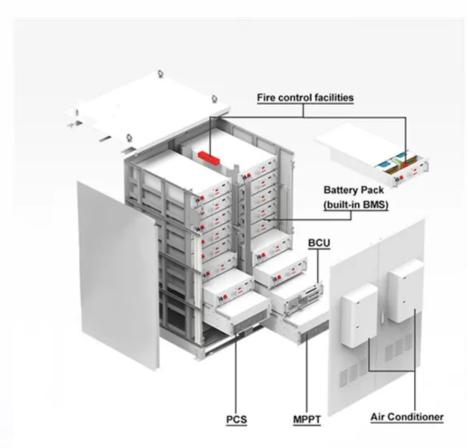

Photovoltaic energy storage applications in Guinea-Bissau

Overview

Near the capital Bissau, a 30 MWp solar power plant will be built with the aim of "reducing the average cost of electricity in the country and diversifying the energy mix, while battery storage will make it possible, in the first phase, to smooth the injection curve and, in the second phase, to provide services to the electricity system", according to the Bissau-Guinean Ministry of the Economy, Planning and Regional Integration. What is the most popular solar application in Guinea Bissau?

As of today, the most popular solar application is the rural individual photovoltaic system that has been exploited in Guinea Bissau for the producing electricity to power houses, schools, offices and hospitals or health centers. Solar water pumping is the second most installed solar application in GB (Ex. PRS I and II in Table 2).

What is wind energy used for in Guinea Bissau?

Wind energy is extracted from wind speeds by wind turbines. It was first used to produce mechanical power (windmills). Nowadays, it is mainly used for the production of electrical power. Unfortunately, none were counted in Guinea Bissau.

What techniques are used to produce electricity in Guinea Bissau?

The main techniques used for the production of electricity are dams but there are also other techniques such us: Run-of-the-river hydroelectric, pumped-storage hydroelectricity, Tidal power and wave power1. Guinea Bissau has an important site for the construction of a dam with a good potential for power generation.

What is the main source of biomass energy in Guinea Bissau?

The most ancient and still the most used today in African countries, is the wood coal and patches for cooking. In Guinea Bissau, it is the main source of biomass energy but not the only one. GB has recently started trying knew application of biomass energy.

What is SNV doing in Guinea Bissau?

SNV is starting a new area of focus in Guinea Bissau: Renewable Energies. The main objective of this paper is to provide SNV Guinea Bissau a portrait of the current status of Renewable Energies (RE) sector in Guinea Bissau, main actors and opportunities of intervention that can lead to a positioning of SNV in this sector.
