

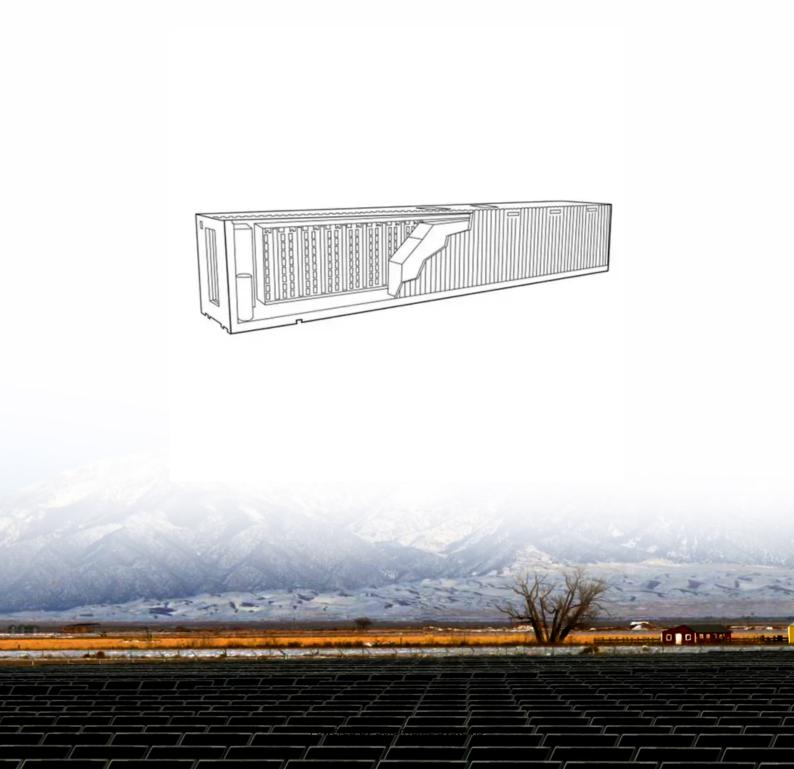

# Photovoltaic energy storage realized price

#### **Overview**

How much does a PV system cost?

Our operations and maintenance (O&M) analysis breaks costs into various categories and provides total annualized O&M costs. The MSP results for PV systems (in units of 2022 real USD/kWdc/yr) are \$28.78 (residential), \$39.83 (community solar), and \$16.12 (utility-scale).

What happens to the market for existing PV installations?

Of course jobs are also saved as a result because the market for existing PV installations will not become smaller in the foreseeable future, even if construction of new installations should remain in a state of decline. Module prices: The minimum price regulation paralyzes the European photovoltaic market.

How much does a PV system cost in 2022?

The current MSP benchmarks for PV systems in 2022 real USD are \$28.78/kWdc/yr (residential), \$39.83/kWdc/yr (community solar), and \$16.12/kWdc/yr (utility-scale, single-axis tracking). For MMP, the current benchmarks are \$30.36/kWdc/yr (residential), \$40.51/kWdc/yr (community solar), and \$16.58/kWdc/yr (utility-scale, single-axis tracking).

Why are photovoltaic products so expensive?

The high demand for photovoltaic products, especially at the beginning of this year, has led to delivery bottlenecks and increased prices. This is due to mild temperatures and the weak euro, which makes imported products more expensive throughout the entire value chain.

How does the minimum price regulation affect the photovoltaic market?

The minimum price regulation paralyzes the European photovoltaic market by preventing a downward price adjustment for solar modules and cells of all regions of origin. Despite this, prices remain largely stable.

How do solar companies help the photovoltaic industry?

Solar companies help the photovoltaic industry by maintaining and increasing the contribution made by existing solar systems to the electricity mix. They achieve this through repair, optimization, and maintenance services, which also confirm general confidence in the reliability of solar technology.

### Photovoltaic energy storage realized price

### <u>Solar Photovoltaic System Cost</u> Benchmarks

The PVSCM system cost is the price paid by the system owner to the system developer. Any tax credit realized by the owner is excluded and must be ...
