### **How Does Solar Work?**

Solar technologies convert sunlight into electrical energy either through photovoltaic (PV) panels or through mirrors that concentrate solar radiation. This energy can be used to generate ...

### Components of Solar Power Systems

On this page, we'll break down all the solar system components and explain how they work. Solar panels convert sunlight into electricity through a process called the photovoltaic effect.

#### WhatsApp Chat

### The 6 types of solar panels, What's the best type?

Discover the six main types of solar panel, including thin-film, perovskite, and the best type for your home: monocrystalline.

#### WhatsApp Chat

Solar panels can produce more energy than your home needs. In that case, the extra solar energy can be sent back to the utility grid or stored in a battery ...
