

# Polish solar rooftop power generation system

#### **Overview**

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.

What is the Polish solar boom?

The Polish solar boom is happening at every level – from smaller, privatelyowned rooftop PV systems and commercial rooftop systems to large freestanding installations.

What are the conditions for solar energy generation in Poland?

Poland has favorable conditions for solar energy generation, with a good amount of sunlight throughout the year. The government has introduced several measures to promote the development of the solar industry, including feed-in tariffs, net metering, and renewable energy auctions.

How much solar power is installed in Poland in 2020?

In 2020, 2635 megawatts (MW) of solar power output was installed in Poland – more than thrice as much as in 2019 (823MW). This put Poland's PV market in fourth place in Europe, behind Spain (2,7 GW), the Netherlands (2,8 GW) and Germany (4,8 GW). The cumulative installed PV power was 3935 GW. And all signs point to further strong growth.

How does the Polish government support photovoltaics?

The ability to produce your own energy not only reduces electricity bills, but also fits into the trend of sustainable living. The Polish government supports the development of photovoltaics through various types of support programs grants. These are initiatives aimed at encouraging companies and individuals

to invest in renewable energy sources.

Are photovoltaics a good investment in Poland?

Currently, there is a dynamic development of photovoltaics in Poland. The number of installed systems is growing, and investments are supported by government programs and local initiatives. Despite the positive trend, the photovoltaic industry in Poland also faces challenges.
